

## Google Map in Joomla Hotel Booking System

In Joomla HBS hotel admin panel you can easily integrate Google Map without having any Google account or any technical knowledge. Please see below how Joomla HBS make it very simple.

In Joomla HBS hotel admin panel you can easily integrate Google Map without having any Google account or any technical knowledge. Please see below how Joomla HBS make it very simple.

Type your Country / State / City or town in text box area and click go button. In Joomla HBS Hotel Admin Area Google map will display your location.

You can also control Google Map using Google Map Navigation. When you find your place just click right mouse button.

Type hotel address in area description area and press Save button.
